Specialized vehicles

Made from specialty steel, our vehicles are fully adaptable for a variety of purposes.
They are unparalleled in durability and safety, and can be customized
to meet your needs to maximize efficiency and functionality.
We provide vehicle solutions optimized for your business,
making us a reliable partner in any environment.

Accurate construction

Assured Technology

Safety First

Good looks and durability

We are a small company that manufactures and delivers special vehicles to local governments, military, police, and fire departments, including various trailers.

Through this, we are becoming a leading company in overseas exports and domestic markets, and we are continuing to grow without stopping even now.

Modularized assembly structure

Through continuous research and development of various special vehicles, including unmanned drone vehicles, we have been producing various special vehicles at home and abroad, and especially delivering them in a DIY manner according to the specifications required by customers.
